## PROJECT PROPSCORE

Propscience uses a unique and highly proprietary algorithm to arrive at Propscores for every project it covers. This score is calculated out of 100 points. Through our detailed research we gather over 500 data points of information about each project. These data points are broken down into categories (mentioned below). An individual score is arrived at for each category and then a combined project Propscore is given. The purpose of the Propscore is to help you evaluate the distinct value you can hope to derive from each aspect of the project.
